**Period for Reply**

**A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.**

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12 July 2004 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 74-79 are finally rejected under 35 U.S.C. 102(e) as being anticipated by Ohno et al, 6,179,689 (cited by applicant, paper no. 4), as set forth in the previous

Office action. Please refer to figure 6 and its description, and to the previous rejection. Note that as there is no guide roller in the device disclosed by '689, the installation of the supply and take-up rolls is completed without passing the medium adjacent a guide roller. Applicant has not claimed a device, only the method. If the device doesn't have a guide roller, the method step of avoiding a guide roller is met. Further, '689 clearly discloses, in figures 6 and 7, a cartridge frame between the supply roll and the take up roll, the rolls being attached (it is inherent that the rolls be attached to the frame, in that the frame supports the rolls in a position within the frame such that the rolls are free to be rotatably driven), the cartridge including a linear member, "extending directly (In a direct line or manner; straight:<sup>1</sup>) between the supply roll and the take up roll, either of the sides which extend between the supply and take up rollers. Note that the top of each side is formed of a linear member.

### ***Response to Arguments***

4. Applicant's arguments filed November 6, 2003 and December 1, 2003 have been fully considered but they are not persuasive. Applicant argues that '689 do not disclose a cartridge frame between the supply roll and the take-up roll, the cartridge including a linear member extending directly between the rolls. The examiner strongly disagrees. As most broadly claimed by applicant, the cartridge frame disclosed by '689 is placed between and around the rolls, and it includes a linear member at the top of the two sides which extends directly, or in a straight line between the rolls. Please refer to the

image of fig. 6 of '689. Applicant has not claimed that the linear member is structurally attached to the rolls, or is a separate part of the frame, as described in his specification. It is the examiner's position that '689 clearly anticipates applicant's claimed invention.

**Conclusion**

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M Rachuba whose telephone number is 703-308-1361. The examiner can normally be reached on Monday-Thursday from 8:30 AM to 3:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail, can be reached on (703) 308-2687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
